

# Wattsun, always and anywhere clean power.

Brochure 2021 

**WATT  
SUN**  
POP-UP POWER

# Where the power grid ends, Wattsun begins..

Nowadays, imagining a world without electricity is impossible. We need power with everything action we take. For the largest part the power we use comes from a central electricity grid. Unfortunately, using this network does not always come naturally. Just try to imagine working en route or at a rural area without having access to

a power socket. In the past there were no efficient and sustainable solutions for this market. Luckily, we are here to make a change.

**We make it possible to have access to clean power anywhere and anytime.** That is our mission

# For our planet

Planet earth is clearly asking us for change. It is up to our generation to adjust to a fossil-free lifestyle. To reduce the pace of climate change we can't wait until tomorrow but have to make the shift to an emission free life today. The time is now! Therefore, we produce and develop products that provide efficient and sustainable energy. Our product gives people the freedom to have access to clean power anywhere and anytime.

**This is where the story of Wattsun begins. Join us on our journey to an emission free future.**

# Pop-up power!

Experience ultimate freedom with Wattsun. Simply plug in and you are insured of clean energy which you can use wherever and whenever you want. Our portable lithium-ion battery system with a 230 Volt socket has been designed for and with professionals.

**Up to 7800 Wh**

**3500 Watt peak**

**230 volt**

**Charged in 5 hours**

# Wattsun Dock

The Dock is the base of our product. Plug in your devices and you are immediately powered by Wattsun. The constant power of 1500 or 2000 Watt makes the Wattsun Dock a powerful energy source.

- 1500 Watt
- 2000 Watt

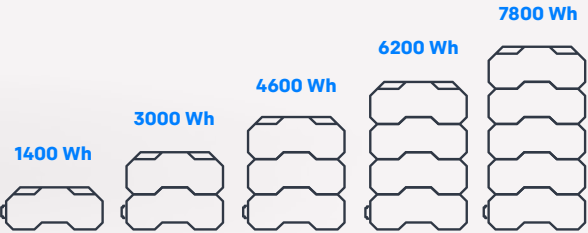

# Wattsun Pack

Do you need more battery capacity? Simply stack a Pack on top of your Dock. The intelligent operating system takes care of the rest. Stack up to a maximum of five Packs.

# Wattsun Stack

With Wattsun you are always provided with power. The total battery capacity can easily be expanded as desired. Did a Pack ran out of power? Do not panic and simply swap it for a charged one. By doing this you will have power all the time...

Stack up to 7800 Wh

# Thoughtful in its simplicity

# One system, endless opportunities

The endless search for a power socket, the time it takes to router wires and the hassle of installing a generator are all actions of the past. With the Wattsun battery system you have a power anywhere and anytime you want, in- and outside. The opportunities are endless.

From a table saw to coffee machine, DJ-booth to security camera and from a laptop to studio lighting; everything can be connected with a plug.

# Discover the power of stacking

Are you someone that uses a lot or a little amount of energy? Do you work for longer or shorter periods of time? We understand that every situation asks for a different type of battery. Therefore, Wattsun is the answer to all your interchangeable power demands.

The stacking system offers endless opportunities to connect different modules without a cable. A unique technology.

In a stack the module on top, delivers energy first. Once this module has ran out of power, the module below it automatically takes over. Meanwhile, you can simply swap the empty module for a charged one. Even while using the stack! This provides a non-stop power supply.

# Experience the pleasure of working electrically

A silent and powerful source of energy that you could use right next to you. No emission, stench, and noise. Thanks to the robust and intuitive design, having power anywhere you want is just one click away. The lightweight and compact design have led to a product you can easily carry around.

The display shows you all the relevant information in a glance. Since you know exactly how long you can use the battery you avoid unpleasant surprises at the end of a workday. You will never be without power anymore. Experience the pleasure of working with 100 percent renewable energy.

## Easy to charge

The Wattsun has a charging connector at the back. You simply attach the charger to recharge the battery. The intelligent operating system makes sure the battery is carefully charged and balances it. The display shows you live the charging statistics so you can easily monitor the status of the charging process.

## You are in charge

### CHARGE WITH THE POWER OF THE SUN

Completely independent, no electrical grid needed, 100 percent emission free and zero costs. Simply by using the energy of the sun. You can charge the battery anywhere you want by using solar panels and the [Wattsun Smart Charger](#).

### CHARGE WHILE DRIVING

The [Wattsun Smart Charger](#) allows you to recharge the battery by connecting it to the dynamo of your car or truck. This means you will always arrive with a fully charged battery.

### CHARGE WITH MAINS POWER

The [Wattsun Charger 360](#) helps you to charge your battery using the normal power grid. In less than five hours your battery is fully charged.

Our service

PERSONAL ADVICE

Do you have no clue what your power need is? We are more than happy to give you personal advice and answer all your questions in the field of portable power supplies. Our mission is to make clean power available anywhere and anytime, so we will do everything to guide you in the process. If you are ready to make the transition to a sustainable and comfortable workflow than we are here for you.

LEASE

Our Battery-As-A-Service model entirely unburdens users. You do not have to make an investment in advance but can immediately enjoy the merits of a portable battery at location! Our fixed monthly fee relieves you from financial risks and worries that ownership involves.

SCRAP VALUE ASSURANCE

Whenever your Wattsun needs to be replaced you can return it to us and receive a discount on your next purchase. We ensure that you will get a fair fee for your product based upon your cycles and product usage.

Dutch design

DUTCH DESIGN AND DEVELOPED IN THE EU

Wattsun was founded in 2016 in Arnhem and was the first company in the field of portable 230 volt batteries. From our first footsteps onwards, we have been working together with Dutch partners to produce and install our products. On top of that, we work with local partners as much as we can to maintain the quality and to reassure a short and efficient logistic chain.

USER-FRIENDLINESS

The Wattsun is extremely user-friendly. Due to the intuitive design and the simplicity of the controls everyone can create a portable source of power, even without having any technical knowledge. The shape immediately communicates that the separate modules can be stacked. The way the modules are stacked does not matter. You can turn them around any way you like, it always works. The charge and discharge programmes are automated in such a way that the user never has to worry about the charging process

RELIABILITY & QUALITY

Reliability is a must. We have chosen high-quality Panasonic Lithium-Ion cells shaped into our own designed battery pack and Battery Management System (BMS). Perfectly suited for the high power the Wattsun supplies. The shell is made of strong synthetic materials and powder coated aluminium.

Talent

WORKING FOR WATTSUN

Wattsun is rising... and while our market stock is growing, so is our team. No day is ever the same when working at an innovative company like Wattsun. Currently we are looking for talented people to join us! Do you have what it takes? Are you full of energy and excited by our ambition? Then do not hesitate and contact us by dialling the number below!
