

Next Generation Automated Follow-System

zactrack **SMART** is the next generation Automated Follow-System. Integrating the newest chipset DMW1001 from market leader DECAWAVE it utilizes state of the art scientific advances in Ultra-Wide-Band (UWB) radio tracking technology!

Together with zactrack's unique and patented alignment algorithms we are proud to present the first real **PLUG and PLAY tracking system** for the entertainment industry.

COMPONENTS

A zactrack **SMART** basic system set consists of

- 1 zactrack **SMART** Server (9,5" half size rack mount)
- 8 Anchors (RJ45 network socket PoE)
- 5 Trackers
- 1 Charging Station
- 4 zactrack **SMART** Pucks

1st real **PLUG and PLAY** Automated Follow-System

- **SMART** self-measurement of all anchors
- Automated fixture alignment with **SMART** Pucks
- UWB Radio Tracking (6,5 GHz)
- For small and medium sized venues (approx. 30x30m)

- Works with every console
- Compatible with unlimited number of fixtures
- Control of lighting, video & sound (+ PTZ cameras with future updates)

Extremely fast setup process of zactrack SMART

- Mount the anchors on different levels around the stage area.
- Connect the anchors with PoE ethernet cables to the server.
- Place the 4 zactrack SMART Pucks in a rough rectangle on stage.
- Run SMART self-measurement – tracking is ready!
- Auto-align your fixtures to the 4 zactrack SMART Pucks on stage.
- No CAD, no Disto & no measuring tape required!

Follow a Tracker with one moving light after **15 minutes!**

LAUNCH PLAN

- Pre-announcement @ London PLASA 2019
- Product launch @ LDI 2019
- First Systems before Christmas 2019
- General Shipment Q1 2020
